

LIFTFX – INSTRUCTIONS

Dear customer,

thank you very much for purchasing liftFX. To give you a perfect start with your new BOOM Library software plug-in, here are some instructions on how to best download and install it.

1. DOWNLOAD

1. You will find the download link in your order confirmation email (please also check your SPAM folder – just in case) and – if you created an account during checkout – on your “downloads” page in your account on <https://www.boomlibrary.com/my-account-downloads>
2. Download and save the file to your hard drive (Please don't use tools such as download managers or accelerators as such tools will instantly use up all your available download attempts).

2. FILE EXTRACTION & INSTALLATION

If you're on a Mac:

1. Extract the zip file starting with “**liftfx_**”
2. Open the extracted folder **liftFX**
3. Double-click the file **LIFTFX Installer.pkg** (file name can vary as it contains the current software version)
4. Follow the instructions

If you're on a PC:

1. Extract the zip file starting with “**lift_**”
2. Open the extracted folder **LIFTFX**
3. Double-click the file **LIFTFX Setup.exe** (file name can vary as it contains the current software version)
4. Follow the instructions

If you have trouble during the installation, please refer to section **1.2 Installation** in the manual. You will find the manual in the “[Downloads](#)” section in your account on www.boomlibrary.com or on the product page in the section “liftFX At A Glance”.

3. iLok REGISTRATION

1. When purchasing liftFX, you will receive a license activation code in a separate email with the subject line: **“BOOM Library | License Key for Order #{order_number}”**. You have to link this activation code to your iLok account and to your computer or iLok device. If you do not already have an iLok account set up, visit [iLok.com](https://www.ilok.com) to create an account and your unique iLok-ID (click [here](#) for a tutorial video).
2. The licenses on your iLok device are managed through a free app called **iLok License Manager**. Download and install the free app from the manufacturer website at [iLok.com](https://www.ilok.com).
3. Start the **iLok License Manager** application mentioned in step 2.
4. Within the **iLok License Manager** app, select the menu entry **Licenses - > Redeem Activation Code** or click the code icon in the upper right corner (next to the search field).
5. If you're not already logged in, a popup window will appear asking you to login.
6. Copy and paste the license activation code to activate it (a 30 numeric character code (i.e. 1234-1234-1234-1234-1234-1234-12)). You will find the activation code in the email with the subject **“BOOM Library | License Key for Order #{order_number}”**
7. Select your iLok USB device or your computer as the activation location to immediately activate the license on this iLok and confirm the location (click [here](#) for a tutorial video).
8. Have fun using your new BOOM Interactive plug-in :-)

If you're experiencing any problems during the installation process, please feel free to contact us via service@boomlibrary.com

Thank you again for your purchase and have a great time using liftFX,
Your BOOM Library Team
